Modelo Prescriptivo: Modelo de optimización estocástica.

$$\max z = \sum_{i} \left[p_i \sum_{k} \pi_k(r_{ik} x_{ik}) \right]$$
$$\sum_{i} x_{ik} \le H, \ \forall k$$
$$\sum_{i} p_i r_{ik} x_{ik} \ge 1.2D, \ \forall k$$
$$x_{ik} \ge 0 \ \forall i, \ \forall k$$

Modelo Predictivo: Regresión lineal o afines.

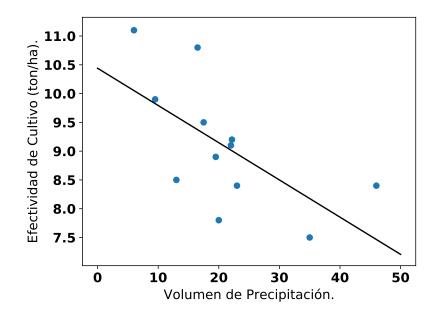

Figure 1: Linear regression.
